

16' Replacement Flatbed Body

Minimum Requirements

General:

1. Replacement 11'x102" flatbed body with 3/16" tread plate steel reinforced floor.
2. Should include headache rack to prevent truck cab damage. Be suitable to mount existing warning lights.
3. Should include stake pockets and rub rail.
4. Should offer the option for either 12" high side boards or 12" high fold down sides and tailgate.
5. Bed is to be primed, painted and installed by vendor. Include pricing for an option to purchase the bed only which could be mounted by MoDOT forces.
6. Stop, tail turn and warning lights should be mounted at the rear of the bed in a way not to be hidden by a sander during winter operations. Physical mounting locations may vary between beds with drop sides.
7. All hydraulic hose connections should be mounted below each rear bed side. Hoses and connectors must be mounted securely and protected. Current style of hose connectors.
8. A license plate holder should be made available at the rear of the bed.
